PROFILE

As a passionate front-end web developer, I specialize in building dynamic, user-friendly, and responsive web applications that deliver seamless experiences. I aim to create clean, efficient, and scalable code and have crafted intuitive interfaces, focusing on responsive design to ensure accessibility across all devices. Whether it's developing from scratch or improving existing designs, I enjoy transforming creative ideas into functional realities.

PROJECTS

[NewsFlash: Curated News Platform](#)

- Developed a dynamic news website aggregating content from NYT Dev, Worldnewsapi, YouTube, NewsAPI, and newsdata.io.
- Implemented user-friendly sections for trending, local, global, and video news.
- Enhanced user experience with an interactive 3D camera model and optimized website performance by streamlining 3D models and images for faster loading.
